

GB Operating instructions

Xtreme Motor Arms (Carbon Fiber)

No. 89081RC

i Please download the latest version of the operating instructions from our website at www.rclogger.com. Navigate to the product page and open the "Downloads" tab. Click on "Operating instructions" to start the download.

The carbon fiber motor arms strengthen the connection between rotors and main frame. This not only improves stability during take-off and landing maneuvers but also reduces the risk of motor arm breakage during harsh landings and crashes.

For safety and approval purposes, you must not rebuild and/or modify this product. If you use the product for purposes other than those described above, the product may be damaged. In addition, improper use can cause hazards such as short circuiting, fire, electric shock etc. Read the instructions carefully and keep them.

✓ Make this product available to third parties only together with its operating instructions.

⚠ Read the operating instructions carefully and especially observe the safety information. If you do not follow the safety instructions and information on proper handling in this manual, we assume no liability for any resulting personal injury or damage to property. Such cases will invalidate the warranty/guarantee.

SAFETY INSTRUCTIONS

Persons/Product

- > The device is not a toy. Keep it out of the reach of children and pets.
- > Do not leave packaging material lying around carelessly. These may become dangerous playing material for children.
- > Protect the product from extreme temperatures, direct sunlight, strong jolts, high humidity, moisture, flammable gases, vapours and solvents.
- > Do not place the product under any mechanical stress.
- > If it is no longer possible to operate the product safely, take it out of operation and protect it from any accidental use. Safe operation can no longer be guaranteed if the product:
 - » is visibly damaged,
 - » is no longer working properly,
 - » has been stored for extended periods in poor ambient conditions or
 - » has been subjected to any serious transport-related stresses
- > Please handle the product carefully. Jolts, impacts or a fall even from a low height can damage the product.
- > If you have questions which remain unanswered by these operating instructions, contact our technical support service or other technical personnel.
- > Do not overtighten screws and nuts. Damaged screws, nuts and threads lose their strength.
- > Do not touch any electronic components. Electrostatic discharge damages electronic elements.

Important steps

1. Make sure you work on a clean and stable surface.
2. Disconnect the flight battery before you start.
3. Remove canopy and propellers.
4. Replace motor arms by following the illustrations (4 motor arms).
5. When you have completed all steps for all arms install propellers and canopy again.
6. Before flying again make sure that all screws and nuts are secured and all parts in proper condition.
